**Oncall Number:** <https://mcint.pagerduty.com/schedules#P2R83BL>

**Escalation Path:**

1<sup>st</sup> Level: On-call Engineer: <https://mcint.pagerduty.com/schedules#P2R83BL>

2<sup>nd</sup> Level: SDM – Angello Otalora - +573002079470

3<sup>rd</sup> Level: CSM – Sandy Benson - +447789920363

**McClatchy SD:** +18008883272

### 4. TICKET MANAGEMENT, ASSIGNATION AND CHANGE STATUS PROCEDURE

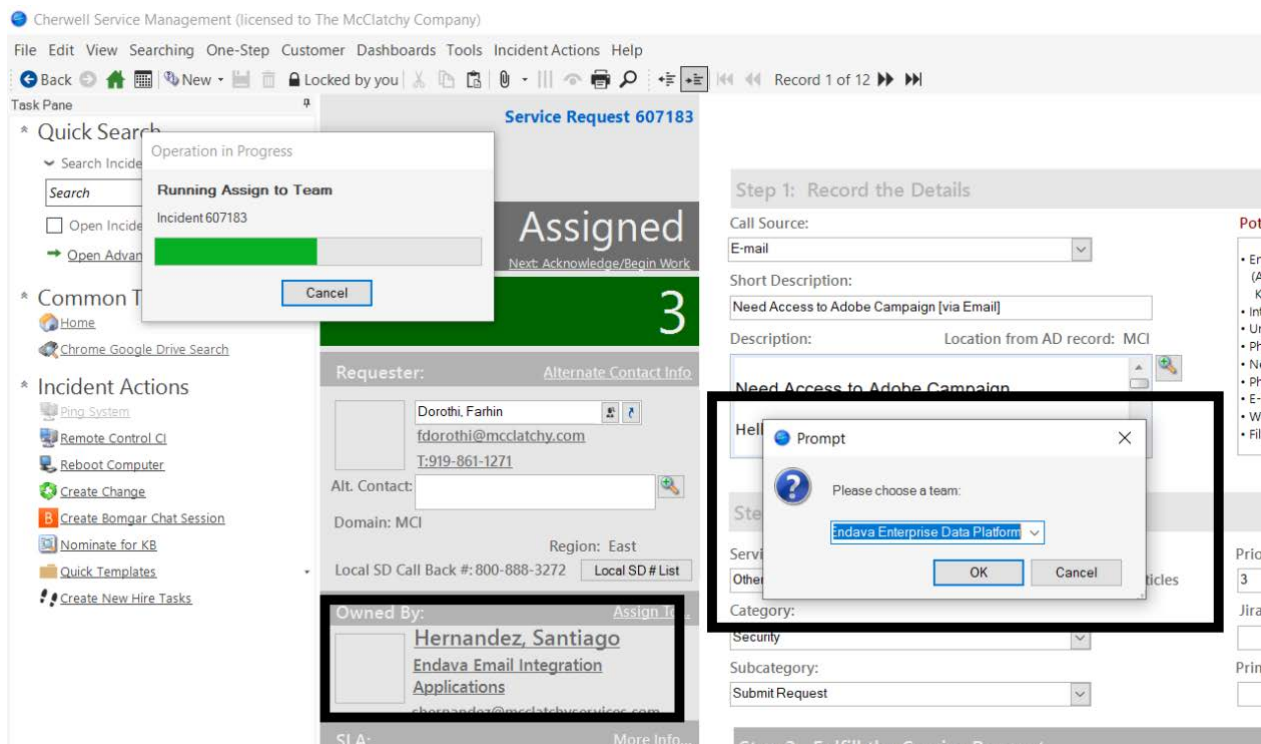

Incidents and Requests related to Audience or NewsWeb streams and their applications defined in the Service Catalog will be logged by the McClatchy SD and then sent to the support teams via Cherwell ticket assignation. The Service Desk will review the ticket and assign to the relevant Cherwell queue.

**\*Major Incidents should be escalated using the Emergency form within Cherwell and activated via PagerDuty notification immediately!**

**Ticket Handling and Prioritization**

1. The initial priority of the ticket should be assigned by the McClatchy SD based on information provided by the customer in the email/call, and the Impact and Severity Matrix in section 7.1.1 below.

**Note:** The service call may be re-prioritized by Endava AM team because of diagnostic investigation and service impact. Lowering the priority of incidents will require prior agreement with CSM. Should the CSM or McClatchy SD wish to raise the priority because of client business impact this is to be agreed with the Endava CSM. **Priority negotiations will be Endava AM team's responsibility.**

2. Upon receiving the email notification from Cherwell, Endava AM team will take over the management of the ticket in Cherwell and provide any updates to the client.
3. If the Endava AM team or the Endava DEV team identify a standard issue with an application, then the Endava AM team should log a ticket in Cherwell and alert McClatchy stakeholders on the incident and priority.

## 5. P1 AND P2 CALL LOGGING AND ESCALATION STEPS

1. McClatchy SD should assign the ticket to the correct queue in Cherwell for the Endava AM team and alert the on-call engineer from Endava AM team by using the Emergency Form in Cherwell and activate the escalation using PagerDuty, and make sure that they are aware of the priority of the Incident and whether it must be treated as a Major Incident or not. If the Endava AM on-call is not answering, PagerDuty will escalate the alert to the different levels provided.
2. Endava AM team could determine if it's a MI or just a P1/P2 incident, to do this Endava AM should assess if the failure corresponds to an entire platform/system in which case this will correspond to a MI in that case they should communicate this straightaway to the PO of the platform affected or if is an isolated failure with a process within the system/platform in which case this will correspond to a P1/P2 depending on the severity of the process.

3. Endava AM team will act as the resolver group, will take over Cherwell management of the ticket and will provide the corresponding updates to be handled by the Incident Manager through the McClatchy Service Desk internal MI procedure/communication (just if it's a MI related). Otherwise Endava AM should handle the ticket with the corresponding SLA (P1/P2) and provided the updates through Cherwell as agreed in the SLA.
4. If needed, Endava AM on-call engineer should call or write through slack corresponding channels [McClatchy's SD](#) in order to instruct them to change the incident to a MI, to link the additional incidents received because of the MI and to follow the MI Escalation process.
5. If the Endava AM Team analyzes the ticket and identifies that the issue is not related to any streams (Audience/NewsWeb), they will notify the McClatchy Stakeholders and McClatchy SD should re-assign the incident to appropriate team.

## 6. SERVICE LEVEL TARGETS (SLT)

SLA definition by Cherwell can be found at:

[https://docs.google.com/document/d/1IBN4kOUh6I5qG\\_wr0v-Oj6NhU1Eiw0VC42QMXseqGlc/edit#IMPACT AND SEVERITY MATRIX](https://docs.google.com/document/d/1IBN4kOUh6I5qG_wr0v-Oj6NhU1Eiw0VC42QMXseqGlc/edit#IMPACT AND SEVERITY MATRIX)

### 7.1 INCIDENTS

		Impact		
		Company	Department	Individual
Urgency	High	1	2	3
	Medium	2	3	4
	Low	3	4	4

#### 7.1.1 PRIORITY DESCRIPTION

Priority	Service Description	Examples
<b>P1- Critical</b>	Whole or critical functions of the application(s) like Adobe Campaign, CUE, Cherwell, Automate, Workflows, Newsletters, Digital Subscription Platforms, AWS are unusable or unavailable causing major impact on multiple service users.	-2 or more newsletters are failing. -Problems with workflows in Adobe Campaign. -Problems with breaking news. -2 or more prototypes are not being sent. -Change paywall in 4 hours or less. -Multiple users are having problems with subscriptions, entitlements. -Problems to ingest EDP files. -Problems accessing CUE, Cherwell.

<b>P2 - High</b>	Partial application like Adobe, CUE, Feedmator, Cherwell, Automate, DSP or EDP are unavailable and detrimental to service user experience, important but not critical.	1 newsletter is failing. 1 prototype cannot be sent. 1 breaking news is failing its process. 1 department is not allowing CUE access. Set of tasks within Automate is failing.
<b>P3 - Medium</b>	The Application like Adobe, CUE, Feedmator, Cherwell, Autoamte, DSP or EDP suffers a low impact error or issue that impairs the use of the features of the Application. The Application suffers a failure that can be circumvented by the user.	- A single user unable to edit/ publish content. - One user is having problems t access adobe. - One user is having problems with his/her subscriptions/entitlements.
<b>P4 - Low</b>	McC, its suppliers, editors or users have questions, queries and or requests for advice with regards to the functions, operation or integration of the Application.	- Minor issues with Adobe Workflows more related to its use. -CUE workflows or how to use.

## 7.2 SERVICE REQUEST

		Impact		
		Must Have	Should Have	Whenever Possible
Urgency	Expedite	1	2	3
	Standard	2	3	3

### 7.2.1 SITECORE PRIORITY DESCRIPTION

Priority	Service Description	Examples
<b>P2 – Expedite - Standard</b>	Service Request to create Newsletters ASAP due to market condition. Service Request to add, modify paywalls conditions. Given Access to CUE due to deadline activities.	- Request to create Newsletters ASAP due to urgent changes in the market's conditions. - Request to modify paywall conditions due to urgent changes in the market's conditions. - Request to giving access to CUE due to deadline conditions.

P3 - Standard	Service Requests to access Adobe. Service Request to create newsletters in short term basis. Service Request to create, modify paywall conditions in the short-term basis. Access to CUE, Cherwell. Create Tasks in Automate. Set of configurations in the platforms.	- Access to Adobe Campaign, CUE, Cherwell. - Request to create modify, delete Newsletter due to incoming changes in the market conditions. - Request to create, modify, delete paywall conditions due to short term changes in the market's conditions. - Configuration, report generation over the applications. - Create tasks in Automate.
